

With premium build quality, Innovex **Cementing Wiper Plugs** give you the confidence that whatever you seal will stay sealed, ensuring you won't have to spend valuable time redoing any cementing tasks due to failed plugs.

### Features & Customer Benefits

- Plastic core allows for fast drill out
- Multiple fin design provides efficient wiping and sealing
- Capable of withstanding up to 5,000 psi bump pressure with top plug landed
- Standard service temperature using natural rubber material: 212° F
- High service temperature using HNBR material: 350° F
- PDC and tri-cone bit drillable

### 610 – Standard Top Plug

The 610 Series Top Plug is a conventional plug with plastic cores that can be drilled out with PDC and conventional drill bits. They feature a standard profile that is compatible with any float equipment that has a flat landing surface.

### 615 – Standard Bottom Plug

The 615 Series Bottom Plug features a multiple fin design that allows for efficient wiping and sealing. It can be used with any flat-surface float equipment, due to its standard profile construction.
