

We understand that the oil and gas industry is constantly evolving. Our **Project Management, Engineering, and Testing** services are designed to empower you to stay ahead of the curve and adapt to these changes effectively.

Integrated Services

Our team of integrated services engineers combines product design, manufacturing know-how, and extensive offshore experience. They're your go-to experts for managing everything from HSE and service quality to project planning, scope definition, risk assessment, and contractor coordination.

We work closely with you to understand your specific challenges. With our expertise, tools, and proven track record, we help you save both time and money.

Specialty Facilities Capabilities

- **High Bay:** This 125-foot tall structure, with an equally deep underground extension, allows us to perform extensive stack-up and testing procedures typically done offshore.
- **Horizontal Test Machine:** Unique to Innovex, this machine tests pipes, connectors, and systems to their full capacities, ensuring they meet ISO 13679 standards.
- **Continuous-Torque Bucking Unit:** Handles 24-inch OD connectors and delivers up to 200,000 ft.-lbs. of torque, pre-installing casing pups to your specifications.
- **Triplex Hydro Test Unit:** Tests up to 30,000 psi, ensuring the integrity of your production components.

Product Training

As an OEM, we offer comprehensive engineering and technical support. We provide detailed service manuals and hands-on training to help you understand how our products work and how they can boost your bottom line and sustainability goals.
