PRODUCTDril-Quip Dril-Thru™ RLDe
Subsea Wellhead

Fewer trips with the **Dril-Quip Dril-Thru™ RLDe™ Subsea Wellhead**, reduces rig time by five days*.

The Dril-Thru RLDe allows casing strings and hangers to pass through the production adapter base and eliminates the need for a lockdown sleeve, streamlining operations to lower costs and risks in even the most challenging applications.

Features and Customer Benefits

- Reduces the number of trips
- Enables the production adapter base (PAB) to be installed prior to the BOP
- Allows casing strings|hangers to pass through the PAB
- Increases casing hanger lockdown capacity, eliminating the need for a lockdown sleeve
- Significantly enhances seal performance
- Qualified per API 6A PR2 requirements
- Extends service life and performs reliably even in the most challenging pre-salt wells
- High flow rates mean fewer wells per field development

**based on water depth and well characteristics*
