

A comprehensive line of **fishing and intervention products** suited for a variety of well workover, intervention, drilling, and completion activities.

Innovex launched into the fishing & intervention industry with the acquisition of Logan Oil Tools, a premier company recognized worldwide as a leading source of quality products delivering “stock to dock” for many large fishing and rental tool companies.

Logan’s commitment to manufacturing high-quality products with on-time delivery at competitive prices is matched by Innovex’s dedication to create customers for life.

Challenges that require Fishing Tools include the need to free stuck tools, achieve release from a stuck drill string, retrieve twisted-off drill or workover string, retrieve miscellaneous tools, bits, parts of bits, chain, or other small objects from the hole or to repair casing.

[FISHING & INTERVENTION](#)

Innovex offers products to fish even the smallest item from downhole, including:

EXTERNAL CATCH

Designed to engage, pack-off, retrieve most sizes of the fish and capable to release from the fish. The rugged construction, simplicity, and strength of the Logan Overshot makes it the reliable choice for all external catch fishing applications.

Available in:

Series 10 Sucker Rod Overshot

Series 70 Short Catch Releasing Overshot

Series 20 Short Catch Sucker Rod Overshot

Series 150 Releasing and Circulating Overshot

Accessories are available for the Overshot Series 150 such as Extension Subs, Wall Hook Guides, Oversize Guides and High-Pressure Pack-off Assemblies.

INTERNAL CATCH

Standard Releasing Spears are used to internally engage and efficiently retrieve all sizes of tubing, drill pipe and casing. Designed to evenly distribute expansion strain over a long vertical section of a fish to ensure positive internal engagement, easy release, and re-engagement. Segment Type Grapple Assemblies are available for larger Casing Sizes beyond the range of a standard one-piece grapple. HE EFL Rotating and Releasing Spear also available.

JUNK CATCHERS

Used to collect and isolate small objects such as bit cones, slips and hand tools from the hole, Junk Baskets are easy to use and available in several variations. All effectively convert to a fishing magnet by removing the junk catcher assembly and replacing with a Magnet Insert Assembly.

BI-DIRECTIONAL COILED TUBING JARS & ENERGIZERS

Designed to jar an upward and downward blow. The Coiled Tubing Jar can be dressed to jar only upward or only downward blows. The Bi-Directional Coiled Tubing Energizer is designed to be operated with the matching Bi-Directional Coiled Tubing Jar. The short lengths of the Coiled Tubing Jar/Energizer are ideal for coiled tubing operations.

SUPERIOR HYDRAULIC FISHING JARS & ENERGIZERS

The Superior Hydraulic Fishing Jar is a straight pull, up only, jarring tool. The Superior Energizer is designed for each size Superior Jar stroke and jarring loads. The Superior Energizer supplies intensified impact during the jarring operation and acts as a fluid spring—storing energy when a strain is pulled on the fishing string.

MILLING & CUTTING TOOLS

A wide range of milling & cutting tools including Welded and Threaded Cup Junk Subs, Crossover Subs, Standard and Hydraulic External Cutters, Internal Cutters, Internal Pressure Pipe Cutter, Rotary Shoes and Junk Mills.

REMEDIAL & REPAIR TOOLS

A variety of repair tools including Casing Rollers, Casing Scrapers and Casing Patches designed to return your workstring to its original state. The Type "A" and Type "L" Casing Patch repairs a section of damaged casing without having to remove the entire string and provides a permanent, rigid connection that will remain leakproof, yet can be easily removed if required in future operations.

POWER SWIVELS

The VTS-100 is a direct drive 100-ton capacity power swivel. The single direct drive hydraulic motor eliminates the need for gears, providing improved efficiency, smoother operation and greater dependability. In addition to the VTS100, traditional 85 ton and 120-ton Power Swivels are available.
