

Streamline your operations with efficient drilling, casing, and cementing—all without breaking the BOP stack. Built for performance, precision, and adaptability.

The G-25 Stacker Drill-Thru System saves you time by facilitating drilling, running, and cementing intermediate and production casing, while eliminating the need to break the BOP Stack to install an intermediate casing spool.

Options

- BOP Quick Connect Adaptor available for batch drilling operations.
- Available with conventional lockdown screws or internal latch retention for hangers and pack-offs.
- Land production casing in a fluted mandrel hanger, solid mandrel hanger, or casing slips.
- Available for 2, 3, and 4 string casing programs.
- Slip-on weld or threaded box bottom connection compatible with a landing base.
- Option to land production casing or tie-back in a nested bowl.
- Contingency casing slips and pack-off assembly provided when casing won't go to the bottom.
- Ability to run control/instrumentation lines within the system upon request.

Specifications

- Available Sizes: 11" and 13"
- Pressure Rating Range: 5,000 PSI - 15,000 PSI
- Temperature Range: L (-50F) – U (+250F) Can be combined
- Trim Levels: AA – EE (FF and HH offered in certain use cases)
- PSL Ratings: 1, 2, and 3
- Hanger Threads: Standard and Premium Threading available
