

**PRODUCT LINE**Surface Wellhead | Frac  
Solutions**PRODUCT**Conveyor Frac Ball Launching  
System

The **Conveyor Frac Ball Launching System**, with its unique patented design, offers an innovative frac ball launching solution for any scenario. It's specifically designed "Dry System" protects the launcher, consisting of Lexan-style doors that also enable our technicians to maintain a constant visual on each frac ball. Its high storage capacity removes the need to shut down and reload, while also eliminating the risk of improper frac ball loading.

**Features**

- 30 frac ball capacity.
- Adaptable to any frac pressures up to 15,000 psi.
- Compatible with any material frac ball up to 5".
- Hydraulic brake and conveyor system ensures only one ball is launched.
- Lightweight system.
- Compatible with any frac head.
- Easily loaded and unloaded without having to depressurize.
- Hydraulic "HCR" operated gate valves for staging.
- Remotely operated well isolation valve to protect against line failures and well integrity issues.
- Launcher logs and job notes provided.
- Patented in the U.S and Canada.
