

The **QCI P3X PLG** is a dual barrier variation that fits in existing competitor hangers. Provides adapter configurations, utilizing a shop assembled, 'plug-in style' surface connector that simplifies the electrical connection at the surface.

Innovex's P3X-PLG also features a second barrier eliminating the possibility of wellbore contaminants reaching the atmosphere in the event of a tubing string failure.

### Features and Benefits

- Additional positive barrier
- No epoxy
- Fast assembly using standard tools
- Operating pressure: 5,000 psi. Max 6,000 psi at 350°F
- Proof tested to 13,500 psi
- Patented cable seal design
- Patented cable lock system
- Support for #4, #2, #1 ESP pump cables
- Class 1, Division 2

### Bundled Services

- Combo ESP cable and CT trailers
- ONE Call – Spooling, Wellhead and Penetrators
- Certified ESP laydown capabilities
- Cable – CT workover and management system
