

The **Production Tree** is a critical piece of equipment that adapts to the top of the wellhead to control the flow of hydrocarbons from the well. It also provides access for well intervention and to perform required maintenance. Innovex's production tree components are available with various sealing, coating, and trim options to overcome the challenges of fluid production or injection. Access for control lines, data lines, instrumentation, and sub-surface safety valves is available upon request.

Specifications

- Pressure Rating Range: 2000 PSI - 15,000 PSI
- Tubing Size Range: 2 3/8" - 7"
- Tubing threads: Standard or Premium Tubing threads available
- Adaptor Top Flange Size Range: 2 1/16" - 7".
- Temperature Range: -75K (K) to +250F (U)
- Trim Levels: AA to EE (FF and HH offered on special order)
- PSL Ratings: 1, 2, and 3
- Gate Valves: Expanding and Slab Gate
- Safety Valves: Pneumatic and Hydraulic
- Standard Flow Tee or Studded cross to access kill valve and swab valve
- Instrumentation flanges to match tree configuration
